

MALMÖ BIOETHANOL™

London is a Danish designed and produced bio fireplace in a tall, elegant slim design for out- and indoor use.

The burner is positioned at the top surrounded by four tempered glasses. One is open at the top, so you can fill the burner up with bioethanol. A clamped top plate completes the design and helps to give vibrant flames and protect it from rain.

There is a cabinet for storage of bioethanol, the shutter and the lighter in the lower part of the bio fireplace. This model is easy to handle with the hidden wheels attached.
(NOTE must only be moved when flames are off and it is cold).

The bio fireplace provides heat and can therefore be used as a patio heater on a cool, starry evening or be used indoors e.g. in conservatories or orangeries.

The model comes standard with 1 shelf.
More can be purchased.

STANDARD FINISH

TECHNICAL INFORMATION

Capacity:	3,2L
Burning time:	Up to 6 hours
Heat efficiency:	2,8 kW/h
Net weight:	55 kg
Burner:	Manual
